PROFESSIONAL SUMMARY

Financial engineering student who builds and operates automated market-making systems on prediction markets, consistently ranking in the top 1% of traders. Python-proficient in trading system design and data analysis, seeking a trading internship to advance algorithmic strategies.

KEY SKILLS

Python | C++ | SQL | Excel | MATLAB | Market Microstructure | Game Theory | Statistics

PERSONAL PROJECTS

Prediction Markets (November 2025 - present)

Build and deploy automated market-making bots for prediction markets, consistently ranking in the top 1% by P&L and trading volume. Engineer high-frequency systems quoting 2,000+ markets simultaneously with 500k+ transactions executed.

Financial Market Analysis (2021 - present)

Conduct market research across forex and cryptocurrency markets, applying technical and fundamental analysis alongside risk management principles while gaining ongoing experience in market analysis, trade execution planning, and risk management principles.

ACADEMIC PROJECTS

Airbnb Price Prediction (January 2026 - May 2026)

Designed a machine learning model to estimate Airbnb rental prices by analyzing property features, cleaning raw data, and testing various predictive methods to achieve optimal results.

Ultimate Tic Tac Toe (January 2026 - May 2026)

Developed an Ultimate Tic Tac Toe game with strategic gameplay logic that evaluates board states and selects optimal moves based on game analysis to compete against other players.

WORK EXPERIENCE

HELPLINE - Paris, France

Programming Intern (June 2025 - August 2025)

- Optimized an open-source tool for automated JSON based diagram generation improving workflow efficiency; adopted for internal use by the firm.
- Developed and maintained technical documentation on GitHub to support knowledge sharing.

EDUCATION

Master of Engineering in Financial Engineering

ESILV – Ecole Supérieure d'ingénieurs Léonard-de-Vinci | Paris, France

Master's level (Diplôme d'ingénieur) in Financial Engineering | Expected graduation: May 2028

International Studies Program

Riga Technical University | Riga, Latvia | September 2025 - December 2025

CERTIFICATIONS

Bloomberg Finance Fundamentals

Gained a foundational understanding of financial markets, instruments, and investment principles that I applied to personal projects.
